Footnotes/Definitions:

1. A Planning Area is a large, contiguous portion of the OCS, consisting of defined OCS blocks, considered as an entity for administrative planning purposes. The quantity and size of a planning area can vary by Region.

2. An Active Lease is a lease that has been executed by the Lessor and the Lessee(s), has an effective date and has not been relinquished, expired, or terminated.

3. A Producing lease is an active lease that has produced product i.e. oil or gas, or both. A non-producing lease is an active lease that has not produced product. NOTE: There can be a difference in the definition for producing and non-producing leases between BOEM and ONRR (i.e. time lag, fiscal versus calendar year, etc) because of different purposes in collecting data (i.e. operations versus revenue collection.)

4. There are 3 leases split between CGOM and EGOM accounting for a small variation in acreage and production as of November 2015 for GOMR.

5. There are 4 planning areas in the Pacific Region but only 1 planning area with existing leases. There are 15 planning areas in the Alaska Region, but only the three planning areas with leases or that are being considered for leasing in the 2012 to 2017 Five-Year Program are displayed. There are no leases or plans to lease in the other planning areas through 2017.

6. Some leases have more than one block. Blocks are generally 9 square miles but can be vary. Slight numerical discrepancies are the result of the processes used during the rounding of acreage.
